

Cape Cod

The Cape Cod combines the charm and character of a traditional design with the cost effectiveness of a 1-1/2 story home. The upstairs area makes a small Cape Cod house into a sizeable home. We will help you design the unfinished upstairs so you or your contractor will be able to easily finish the upstairs level. A four-bedroom home is a surprisingly affordable home.

Loft

The Loft home is borrowed from the traditional Cape Cod design, but it incorporates the elements of a chalet style home as well. The living room is typically open to the roof on the glassed-in end for a spacious, open feeling. Popular options for this home are cedar siding, fireplaces, and custom windows or doors.

Ranch

The Ranch style home is by far the most popular home and the most adaptable home built today. The Ranch style home can be designed as large or as small as need. Typically the home is built in two modules but one can easily add more modules to change the exterior look or to increase the square footage of the home. The Prow is an alternative Ranch style which is great for narrow lots, presents an attractive outside appearance and offers a panoramic view from the inside.

TLC Little Lodges

When site restrictions requires you to build small, a TLC Little Lodge can be customized to fit your lot. If your busy life style keeps you on the go, an efficient lodge will reduce your maintenance time as well as your energy costs. An even smaller little lodge could be a garden house, studio, home office, patio/picnic shelter, hobby place, party room, fair booth, game room, retreat, pet salon, etc.
